codeboy's rant

Hey look, an all-new format. As if you can even remember what the last issue looked like or when it came out. But on to more trying issues like the paper crisis, bathing in grease and the claim that Crispix® is "crispy times two." The only thing that really concerns me about all of this change is the straightforward approach now taken in the T-shirt section, that's marketing for ya'. Anyway, back to this Crispix thing. What are they trying to say? Now I could see "really crispy" or even, "slightly more crispy than those less fortunate cereals," but ,"times two" is a fairly bold statement. It's as if to imply that their cereal actually alters the consumers' olfactory senses beyond repair, causing a near fatal addiction to the product.

There! Anyone left reading at this point should feel pretty darn special (I lost the rest about a sentence and a half ago). So where were we? Ah, Crispix. I can't wait to get home for another bowl or two. I can quit any time I want, I swear. There's nothing like being in the grips of a serious Crispix bender, though. Then imagine going into the bathroom naked, except for a gorilla suit, targets painted on my knees and a bathtub full of broken china. That brings me to the point of this very special Rant (believe it or not); CastleVania'™ 64 is a fairly boring game! Thank you for reading, I hope you can find your way through this cluttered and extremely timely issue of Dangerous Waters. And be sure to vote for us in the upcoming Consistently Late Publication of the Year Awards.

Power to the Weebles,

Mailbox

The Voice of GameShark Fans.

I am writing a book and I need you to write in opinions on what the fourth (5th and so on if you want) dimension is, and write in about how to make time travel possible. Thanks.

—Anonymous

This seems a bit off topic, but I'll take a shot. Some people argue that Time itself is the 4th dimension, i.e., as time progresses things are never the same as they were the moment before. We are moving all the time, as a result of the movement of the planets, the solar system and the galaxy, as well as just plain getting older. Granted, this movement occurs in 3rd dimensional Space, but in 4th dimensional Time.

Not to crush anyone's hopes, but Time travel, as far as my understanding goes, can only occur in one direction—forward, as limited by Einstein's Theory of Relativity. As an object approaches the speed of light, Time, as perceived by the object, slows down, but never reverses, as the speed of light is as fast as an object can travel. To make a long story short, if you take a trip at the speed of light for one year (relative to you), upon your return, you will have managed to, travel ahead 80 years. But you can never go back.

I hope this helps, and if you readers do not understand this sort of thing, just skip it.

Kato's Game Review

An unbiased look at what's hot and what's not.

Title: Winback
Developer: KOEI
Publisher: KOEI
Format: Cartridge
# of Players: 2
Difficulty: Moderate
Available: Late Spring '99

Our office managed to secure a BETA copy of *Winback* from KOEI for the Nintendo® 64. If you have not heard of this title before, try to imagine a cross between *Metal Gear Solid* ™ (PSX) and *Mission: Impossible* (N64). Believe me, it is full of action.

Your character is part of a team that is charged with retaking (or win-back, get it?) a base that houses a powerful energy weapon which has recently been taken over by menacing terrorists. Unfortunately for the rescue team, their aircraft loses power while flying to the drop zone point and everyone has to jump ship. Kind of an inauspicious start, is it not?

Your job is to locate your comrades and carry on with the mission, a task easier said than done. The AI (artificial intelligence) is good and the scene-cuts show the menacing terrorists in full detail.

As of this writing, there are two modes of play. The first, obviously, is the main game and the second is a multi-player versus mode. Yes, you and three friends can select your characters and fight head-to-head in a shrapnel-laced, bullet-filled slugfest.

The third person screen view is exceptional. You can even use a few different moves to keep yourself concealed in order to get the drop on the enemy. Your only true friend throughout the insanity is your sidearm, a .45 caliber pistol with infinite ammo. Later on in the game, if you're alive that long, you can pick up an MP5 and a Tactical Shotgun to increase your firepower.

All in all, *Winback*, looks to be one hot shooter.

To win back the base, you'll first have to defeat a horde of terrorists!
